Job Description – **Senior UI Developer**

Designation - Senior UI Developer

We are looking for an AngularJS Developer responsible for the client side of our service. Your primary focus will be to implement a complete user interface in the form of a desktop web app, with a focus on performance. Your main duties will include creating modules and components and coupling them together into a functional app. A thorough understanding of all the components of our platform and infrastructure is required.

Responsibilities
- Delivering a complete front end application
- Ensuring high performance
- Writing tested and idiomatic JavaScript, HTML and CSS
- Governing the whole user interface and experience
- Cooperating with the back-end developer in the process of building the RESTful API

Skills and Qualifications
- Proficiency with JavaScript, CSS3, HTML5, RESTful APIs, Asset Management tools(Grunt/Gulp).
- Professional, precise communication skills.
- Deep knowledge of AngularJS practices and commonly used modules based on extensive work experience.
- Experience in working with angular bootstrap and data visualisation libraries (Chart.js).
- Experience with all levels of operation available to the front-end, such as from creating XHRs in vanilla JS to using a custom wrapper around $resource.
- Validating user actions on the client side and providing responsive feedback.
- Creating custom, general use modules and components which extend the elements and modules of core AngularJS, when needed.
- Experience with building the infrastructure for serving the front-end app and assets.
- Creating self-contained, reusable, and testable modules and components.
- Ensuring a clear dependency chain, consistent with the app logic as well as the file system.
- Thorough understanding of the responsibilities of the platform, database, API and other web services used in the system.

About the organization

VoerEir is a start-up founded in 2015, with the focus on helping telecom operators succeed with their NFV transformation. Within our first two years we have managed to get a list of coveted customers which we are extremely proud of. The list of costumers consists of several international tier one operators and some major suppliers.

Our team, young and hungry, has many years of experience from OpenStack, NFV, Telecom application development and VNF onboarding. We continue to upgrade our knowledge base through industry cooperation, open source community engagement, cooperation with university and most important assignments to evaluate and help to improve many different NFV infrastructures.
